

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1-23. (Canceled)

1 24. (New) A method of generating a patient report, comprising:
2 presenting a list of reports, each report being associated with a plurality of organs
3 and containing medical descriptions of the associated organs;
4 receiving selection information indicative of a selected report;
5 presenting an organ list of associated organs corresponding to the selected report;
6 for each associated organ presenting a list of applicable medical descriptions and
7 receiving a selected applicable medical description, wherein the selected applicable medical
8 description is associated with said each associated organ; and
9 outputting a patient report comprising the selected report.

1 25. (New) The method of claim 24, wherein the steps of receiving each
2 includes receiving input from an operator.

1 26. (New) The method of claim 24, further comprising receiving a composed
2 medical description and associating the composed medical description to one of the associated
3 organs corresponding to the selected report.

1 27. (New) The method of claim 26, wherein receiving a composed medical
2 description includes editing a standard medical description.

1 28. (New) The method of claim 26, wherein receiving a composed medical
2 description includes receiving user provided comments.

1 29. (New) The method of claim 24, wherein outputting a patient report
2 comprises outputting a medical description each associated organ corresponding to the selected
3 report.

1 30. (New) The method of claim 24, wherein the list of reports includes
2 radiology reports.

1 31. (New) The method of claim 30, wherein the list of reports is presented in
2 a pop-up menu.

1 32. (New) The method of claim 25, wherein the list of applicable medical
2 descriptions is presented in a pop-up menu.

1 33. (New) The method of claim 24, wherein outputting a patient report
2 includes printing out the patient report.

1 34. (New) The method of claim 24, wherein outputting a patient report
2 comprises displaying the patient report on a computer screen.

1 35. (New) The method of claim 24, wherein the organ list is presented in its
2 entirety on a screen.

1 36. (New) The method of claim 24, further comprising generating a billing
2 report associated with the selected report.

1 37. (New) A computer system for generating a patient report, comprising:
2 a system configured to display an on-screen menu comprising a list of reports,
3 each report containing medical descriptions of organs associated with said each report;
4 a system configured to receive selection information indicative of a selected
5 report;
6 a system configured to display an on screen organ list of associated organs
7 corresponding to the selected report and to display a list of applicable medical descriptions for
8 each associated organ;
9 a system configured to receive information indicative of a medical description for
10 at least one of the associated organs corresponding to the selected report; and
11 a system configured to output a patient report comprising the selected report.

1 38. (New) The computer system of claim 37, wherein the system configured
2 to receive information indicative of a medical description is further configured to permit an
3 operator to select one of the standard medical descriptions for each organ.

1 39. (New) The computer system of claim 38, wherein the a system configured
2 to display an on screen organ list of associated organs is further configured to display the
3 applicable medical descriptions in a pop-up menu.

1 40. (New) The computer system of claim 37, wherein the system configured
2 to display an on-screen menu comprising a list of reports is further configured to receive from a
3 user a composed medical description for one of the associated organs.

1 41. (New) The computer system of claim 37, wherein the s system configured
2 to display an on-screen menu comprising a list of reports is further configured to display the list
3 of reports in a pop-up menu.

1 42. (New) The computer system of claim 37, wherein the on screen organ list
2 of associated organs is displayed in its entirety on a single computer screen.

1 43. (New) The computer system of claim 37, further comprising a system
2 configured to generate a billing report of the associated organs corresponding to the selected
3 report, wherein a billing entry is made for each of the associated organs.

1 44. (New) A computer user interface for generating a patient report,
2 comprising:
3 a first screen presenting an operator with a menu of selectable reports, each report
4 containing medical descriptions of organs associated with said each report; and
5 a second screen presenting the operator with an on screen organ list of one or
6 more organs associated with a selected one of the reports, wherein a menu of selectable standard
7 medical descriptions is provided for each of the associated organs, the second screen being
8 presented in response to the user selecting one of the reports.

1 45. (New) The method of claim 24, wherein the organ list comprises a subset
2 of an organ list corresponding to the list of reports.

1 46. (New) The computer system of claim 37, wherein the organ list comprises
2 a subset of an organ list corresponding to the list of reports.
